

U.S. ARMY

USACE-FY19-CRB-Veligar Sampling

Prepared by Damian Walter
Walla Walla District

- January 21, 2020

Unclassified/FOUO

US Army Corps
of Engineers

DISCOVER | DEVELOP | DELIVER

Summary:

- 1) Sampling roughly every two weeks starting Mid-May to beginning of October
 - 1) NWW- 9 plankton tows every 2 wks.
 - 2) NWP- John Day and Dalles
 - 3) NWS-
- 2) Routine locations, not additional sites
- 3) Primarily Plankton tows and artificial and solid structure examination
- 4) To knowledge all non-detect.
- 5) Having personnel turn over issues and funding/budget cuts from BPA. Management questioning maintaining effort; especially with cost-share.
- 6) Stable for CY20, however had to work justification/discussion with NWD to keep BPA funding this effort to protect infrastructure due to BPA's financial situation.
